

Safeguard yourself and your business by getting up to speed with OSH

The law is changing

Providing a safe and healthy working environment for your team is a big responsibility. Legislation is complex and changing. The National Certificate in Occupational Health and Safety (Level 3) will equip you with the skills and knowledge you need.

Gain your National Certificate in Occupational Health and Safety Level 3

As an exclusive offer for our Competenz customers, we are working with training providers to bring you a one-off, four-day course that will result in this nationally recognised certificate. This course is designed for managers, team leaders or employees with responsibilities for OSH.

What will you learn over the four-day course?

Module 1

Introduction to the proposed new legislations and the possible impacts on industry | Requirements of the Health and Safety in Employment Act 1992 | How to investigate accidents.

Module 2

How to investigate, report and manage hazards | How to assess risks and ensure safe work practices | Fire and emergency warden duties.

Module 3

How to identify and manage discomfort pain and injury (previously known as repetitive strain injury) | How to prevent back injuries.

Module 4

How to identify and manage drug and alcohol issues in the workplace | Techniques for investigating and planning (or) knowledge of electrical safety in the workplace.

Cost

Registration fee \$250.

Limited Seats

Only 12 places available, on a first-in-first-served basis.

When, where and how to register?

Visit [our website](#) (or) contact your account manager.

Terms and conditions: Competenz will coordinate the training and invoicing. Our training partners will manage and provide the training. Trainees will need to complete a training agreement and provide a copy of their passport or birth certificate. As trainees can have only one training agreement with Competenz at any given time, the course is available to people not already signed into a training agreement when the course is delivered. People registering for this training are expected to be responsible for OSH (or some OSH activities) in their business.
